Here was a Land to be Opened

Here in Canada was a land to be opened. It was fitting that the men of the North, British and French, imbued with the spirit of adventure, should find their way across the broad Atlantic to this work. «The fastnesses of the Rocky Mountains found their match in Alexander Mackenzie. The task was superhuman, but at last man triumphed, broke through and topped the hitherto impassable barriers of the Rockies. «Where man could go, a path could be found, rails could be laid and trains could move. Thus British Columbia could join hands with Nova Scotia and trade with the Orient was assured. «Confederation, long dreamed of, thereby became an actuality and the Canadian Pacific fifty years ago commenced to forge the link that was to bind the Dominion with tracks of steel from sea to sea.

SIR ALEXANDER MACKENZIE, master of the Island of Lewis in the Hebrides, was the first white man to reach the Pacific by land. Ten many years the creek from which he viewed the Western Ocean bore an inscription

placed by his own hands: "Alexander Mackenzie from Canada, by land, the twenty-second of July, one thousand seven hundred and thirty-three. Lat. 52° 22' 48" N."

CANADIAN PACIFIC TODAY

The Canadian Pacific Railway runs from the Atlantic to the Pacific Ocean. Its lines and from Vancouver and Porters in Japan and China, and from Montreal, Quebec and Saint John to Great Britain and the Continent. It spans a continent from its Maritime coast, the West Indies and round the World, and is a water route to America. Its stations and hotels represent the latest work in comfort and luxury its telegraph system employs 120,000 miles of wire. Its express mail-trains, airplanes can connect all over the world. Canadian Pacific offers and agents are to be found everywhere.

In our January 1981 issue we announced a new series by Mr. Amos in which he explains that, although Western writers for the most part regard one of the members of the oligarchy of Communist business men who recently returned from a tour of four of China's cities a "hero of history" approved of the new Mr. Amos is taking. But further interest is added by *Frontier* this new announcement that steps are being taken to attract Canadian visitors to China. The second article will be presented in our next issue.

THERE are hundreds of people in Missouri who can remember how, in their childhood days, across miles of route, they knew nothing about Child Psychology, were unable to produce a child, and that "it was not a failure of mind and very seldom Schizophrenia" but, the Mineral, Lead, Zinc and Fluorine Company will get you—just how that inquiry has been handled and how the M. L. H. and F. has come to be regarded as almost the same thing as human health, is related on page 34 by C. L. Bailey. Mr. Bailey by many years has been director of the Mineral Health Film. His story is a result of a long research and meditation, and it should interest all who use electricity every day.

500 Business Executives and Office Workers helped Parker plan this new **DESK UNIT**

Compactly holds various desk supplies including Parker Duofold Desk Pen with a Pocket Cop and Clip for changing it over to a Pocket Pen, or will

Do you know that the average office worker has to stop writing 410 times daily to dip his pen? That a Parker Desk Fountain Pen puts all this lost motion at work, and thus adds 3 weeks' productive time to your year?

These facts were disclosed by a prominent firm of efficiency engineers who recently completed a thorough study.

On receiving their reports, we determined to give the business world a fountain pen Desk Unit at a price so low that no one could afford any other kind of desk equipment. A unit that would hold not only the Parker Pen, but also the other desk articles most frequently used, yet most usually strewn about the desk top, causing disorder and delaying work.

500 Voted for This

We went into scores of offices—interviewed 500 executives and other office workers. We found that they wanted a Calendar

*From time studies made by Edwin G. Booz Savers.

Memo Pad, places for Paper Clips, Pins, Pencils, and—newest of all—a Reservoir for ink, so the writer might refill his fountain pen without leaving his desk.

Then we engaged Everett Worthington—talented designer—to combine them compactly, and handily grouped, in this new Parker Duofold Desk Unit. It ornaments the finest desk, and harmonizes with any finish.

All Parker Pen owners can have it for only \$8.00, for they do not require a second Pen. We give them an attachable pen taper to convert the Parker Pocket Pen they have to a Desk Pen, at will.

All others can get this complete Desk Unit with a Parker Duofold Tapered Desk Pen—Guaranteed for Life—at only \$15.00. To them, we give free, a pocket cap with clip to change the Desk Pen to a pocket model.

Lose no time in seeing this revolutionary Desk Unit at this revolutionary price. Go to the nearest pen dealer.
